Question: This is the format for how a question and answer for that question should appear. Only .doc and .docx files should be uploaded.

Answer: Every question should begin with the text 'Question:'. An answer will need to follow the question in a new paragraph. The answer should begin with the text 'Answer:'. This is part of the answer for the first question.

An answer can appear in multiple paragraphs. This is also part of the answer for the first question.

The file uploader only supports reading in text. Though the text may be formatted for readability in the document (bold, underline, text color, etc.), but it will not appear in the uploaded version.

Question: This is the second question.
A question can also be split across multiple paragraphs as well.

Please make sure the file is in the correct format, or the contents of the file will not be saved to the system.

There must be the same number of questions as answers.

Question: Please contact an administrator if you have any questions.
